

Tube joiner 1 1/4 to 1 1/8 tube size. Model #TJ 1.25-1.125

- Effectively reduces the length of truss tubes without sacrificing stability.
- Tubes can be nested together for transport.
- Great for compact carry-on designs.
- Retains more consistent and durable collimation than typical telescoping poles.
- More than one joiner can be used to reduce the length of truss poles further.

- *Material is black Delrin.
- *Press-in tube inserts are included.
- *Weight of one assembly is 58 grams, 2.1 oz.
